1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-37 is that none of the references cited, taken either singly or in combination, teach or disclose a method of consolidating a zone or formation, as set forth in the claimed combinations, including the representative step and/or limitation(s) in claim 1 wherein the drilling fluid utilized in the drilling step (a) has "a pH in the range of from about 6 to about 10" and further includes a "polymeric cationic catalyst capable of accepting and donating protons" which catalyzes and cures a "a water soluble or dispersible thermoset resin", which in turn crosslinks "a water soluble or dispersible polymer", both of which are included in a subsequently-injected treating fluid. In this regard, the cited prior art, such as Ortloff (3,126,959), Sydansk et al (4,722,397), and Gaudy et al (3,935,910) appear to drill a wellbore and consolidate a penetrated zone or formation with a single drilling/treatment fluid and/or fail to teach or disclose the recited reaction mechanism and/or interaction between the drilling fluid and subsequent treating fluid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 703-308-2152. The examiner can normally be reached on M-F (6:30 - 3:00).
